Subject: Burro sighting 09/24

Barrett,

I wasn't able to locate the right form, so I'll fill one out later.

Here's the basic information.

- September 24, 2011 @ 5:20 pm
- 13 burros, including 2 or 3 young
- At mile 5.3 E, this side of Papalote Encino
- They scattered when I approached but didn't seem too concerned. Didn't move off rapidly or particularly far
- Were not within sight when I returned from feeding cattle at Jackson Pens, Pila Montoya around 6:00 pm
